Jack Stehn

Data Scientist

San Francisco, California • jack.stehn@protonmail.com • www.linkedin.com/in/jack-stehn • github.com/jstehn • greenwolf.me

PROFESSIONAL SUMMARY

Data Scientist expertly blending rigorous social science research with production-grade engineering. I specialize in the full ML lifecycle—translating complex data into actionable insights and deploying explainable predictive models that drive measurable business outcomes. I am focused on bridging the gap between statistical foundations and scalable, ethical applications.

EXPERIENCE

Data Scientist / Customer Delivery Engineer (Contract)

Mar 2026 — Sep 2026

Innovare

- **K-12 Student Data Quality:** Worked across school partners' student data, including assessment scores, grades, and attendance. Validated it end to end, from source systems to final reports, and wrote automated data tests to catch errors before they reached educators.
- **Analytics Layer Stewardship:** Owned the correctness and interpretability of the EdTech analytics layer, ensuring metrics, segmentation, and dashboards stayed trustworthy for school leadership decision-making.
- **Stakeholder-Ready Insights:** Delivered presentation-ready analyses for enterprise accounts, translating raw operational data into segmented, decision-driving narratives for non-technical school leaders.
- **Customer-Facing Analysis:** Diagnosed data quality and metric discrepancies for enterprise customers, applying statistical reasoning and domain knowledge to surface root causes rather than just symptoms.
- **Analytics Architecture Input:** Consulted using data engineering experience on the company's data architecture roadmap, planning for a Medallion structure on BigQuery to give analytics workflows reproducible, well-tested foundations.
- **Workflow Automation:** Automated recurring analytics workflows so the team could spend more time on high-leverage exploratory analysis and less on manual report production.

Data Scientist (Lead: ML, Data Engineering, MLOps) - Ed Pioneers Fellow

Sep 2024 — Oct 2025

Caliber Public Schools

- **Predictive ML & Risk Modeling:** Developed and deployed explainable ML models (Logistic Regression, Deep Learning) to predict staff turnover. Engineered a 'Risk Tolerance' configuration allowing non-technical leadership to adjust precision/recall thresholds based on quarterly hiring capacity.
- **Strategic Leadership (Solo Data Lead):** Owned the full data lifecycle (DS, DE, ML) as the sole data scientist. Partnered directly with C-suite and department heads.
- **Survey Design & Enrichment:** Leveraged data to enrich staff satisfaction surveys with demographic, work location, role, grade level, and tenure data, enabling highly segmented and actionable insights.
- **Data Democratization:** Designed data literacy training modules, empowering school leaders to access real-time attendance and academic metrics without technical bottlenecks.
- **Stakeholder Management:** Partnered with leadership on high-impact, data-driven solutions; presented findings to stakeholders including the Board of Directors.

Data Scientist (ML, NLP, Causal Inference)

Aug 2021 — Feb 2023

SetSail

- **Production ML (Revenue):** Developed and deployed production ML models for Propensity Scoring (deal closure probability) and Churn Modeling. Leveraged NLP on unstructured email metadata to identify sales signals.
- **Business Impact:** Contributed to product enhancements that achieved 33% faster ramp times, 16% higher revenue, and 15x ROI for customers.
- **Causal Analysis:** Performed deep causal inference studies to isolate specific sales behaviors that drive outcomes, influencing the product roadmap to focus on 'high-leverage' user actions.
- **Scalable Data Modeling:** Architected scalable Star Schema data models and optimized ETL/ELT processes, ensuring data readiness for LLM integration.
- **Technical Consulting:** Acted as a technical consultant for enterprise customers, diagnosing complex data discrepancies and proposing architectural solutions.

Data Science Research Team Lead

Sep 2020 — May 2021

UC Berkeley School of Public Health

- **Leadership:** Led data science components for mixed-methods studies on equity and public health (specifically violence against homeless youth). Managed a team of undergraduates.
- **Unstructured Data:** Analyzed diverse unstructured and non-traditional datasets (qualitative interviews, geospatial data, text corpora, hand-drawn maps) requiring the development of novel data processing approaches.
- **Geospatial Analysis:** Performed geospatial analysis (ArcGIS) to identify and visualize spatial violence patterns for non-technical stakeholders.
- **Visualization:** Created interactive dashboards (Tableau, Plotly) to communicate findings to stakeholders.
- **Interdisciplinary Collaboration:** Collaborated across disciplines (public health, psychology, sociology) ensuring ethical, robust research.

EDUCATION

University of California, Berkeley

Aug 2019 — May 2021

Bachelor of Arts in Data Science (Domain Emphasis: Quantitative Social Science)

GPA: 4.00/4.00

Highest Distinction (Summa cum laude). Outstanding Data Science Undergraduate Award (Top of Class).
