Jack Stehn

Machine Learning Engineer | Data Engineer | Data Scientist

San Francisco, California • jack.stehn@protonmail.com • www.linkedin.com/in/jack-stehn • github.com/jstehn • greenwolf.me

PROFESSIONAL SUMMARY

High-agency Data Professional specializing in bridging the gap between 'notebook data science' and production-grade scalable infrastructure. I architect end-to-end systems—from raw ingestion to deploying predictive models that drive revenue. I bring a software engineering mindset to data teams, championing CI/CD, unit testing, and modular design to untangle complexity and build maintainable tools.

EXPERIENCE

Data Analytics & Customer Delivery Engineer (Contract)

Mar 2026 — Sep 2026

Innovare

- **K-12 Student Data Quality:** Worked across school partners' student data, including assessment scores, grades, and attendance. Validated it end to end, from source systems to final reports, and wrote automated data tests to catch errors before they reached educators.
- **EdTech Analytics Reliability:** Specialized in the stability and scalability of the EdTech analytics layer, ensuring high-stakes dashboards and datasets are accurate, reliable, and actionable for school leadership teams.
- **Enterprise Customer Delivery:** Managed complex data pipelines, automated manual workflows, and delivered presentation-ready insights for enterprise accounts — translating raw data into decision-ready artifacts for non-technical stakeholders.
- **Data Architecture Consulting:** Helped design the next-generation data architecture, proposing a transition plan to a Medallion (bronze/silver/gold) infrastructure on BigQuery to improve traceability, testability, costs, and downstream analytics velocity.
- **Modern Stack Proposal:** Proposed adopting a modern open-source stack — Terraform for IaC, dlt for ingestion, dbt for transformation, Dagster for orchestration, Cube.js for semantic layer — to replace ad-hoc workflows with a maintainable, version-controlled, observable platform.
- **Technical Guidance:** Guided the team's use of dbt and Dagster to build extensible analytical assets, speeding up custom solution deployment across multi-tenant clients.
- **Workflow Automation:** Automated previously manual customer delivery workflows to reduce turnaround time and free engineering capacity for higher-leverage analytics work.
- **Customer Data Verification Tool:** Built a tool for the Customer Success team to verify that incoming customer data loaded correctly, and wrote a guide so they could run it on their own.

Data Scientist (Lead: ML, Data Engineering, MLOps) - Ed Pioneers Fellow

Sep 2024 — Oct 2025

Caliber Public Schools

- **Strategic Leadership (Solo Data Lead):** Owned the full data lifecycle (DS, DE, ML) as the sole data scientist. Partnered directly with C-suite and department heads to navigate a 'zero-to-one' environment, moving the org from manual spreadsheets to automated warehousing.
- **Predictive ML & Risk Modeling:** Developed and deployed explainable ML models (Logistic Regression, Deep Learning) to predict staff turnover. Engineered a 'Risk Tolerance' configuration allowing non-technical leadership to adjust precision/recall thresholds based on quarterly hiring capacity.
- **Modern Data Stack Architecture:** Architected and built a scalable platform on Google Cloud Platform (GCP). Orchestrated ELT pipelines using Dagster, dbt, and dlt to ingest data from disparate SIS (School Information Systems) and HR platforms.
- **Engineering Maturity (ROI):** Engineered a comprehensive People Team data pipeline, reducing manual consistency checks from months of collective annual work to seconds. Built a custom automated data quality framework to catch inconsistencies between systems.
- **API Integration & Interoperability:** Solved complex data interoperability challenges by designing integrations between Schoolmint and PowerSchool. Reverse-engineered undocumented APIs to create a unified data model for cross-functional analysis.
- **Cross-Department Data Partner:** Served as the go-to data partner for the Enrollment, HR, and Special Education teams, learning each team's workflows and data needs; built tools the Special Education department uses to work with its own data.
- **Data Democratization:** Updated the organization's data security policy and designed data literacy training modules, empowering school leaders to access real-time attendance and academic metrics without technical bottlenecks.
- **Survey Design & Enrichment:** Leveraged data to enrich staff satisfaction surveys with demographic, work location, role, grade level, and tenure data, enabling highly segmented and actionable insights.
- **Stakeholder Management:** Partnered with leadership on high-impact, data-driven solutions; presented findings to stakeholders including the Board of Directors.

Data Scientist (ML, Data Engineering, MLOps)

Aug 2021 — Feb 2023

SetSail

- **Business Impact:** Contributed to product enhancements that achieved 33% faster ramp times, 16% higher revenue, and 15x ROI for customers.
- **Production ML (Revenue):** Developed and deployed production ML models for Propensity Scoring (deal closure probability) and Churn Modeling. Leveraged NLP on unstructured email metadata to identify sales signals.
- **Pipeline Architecture (AWS):** Led a critical overhaul of the AWS data infrastructure (S3, Athena, EMR). Implemented 'SQL Push-down' strategies and asynchronous DAGs, reducing data processing latency by 75% and scaling to multi-terabyte datasets.
- **Scalable Data Modeling:** Architected scalable Star Schema data models and optimized ETL/ELT processes, ensuring data readiness for LLM integration.
- **Engineering Best Practices:** Championed the adoption of CI/CD pipelines (GitHub Actions), unit testing (pytest), and Agile methodologies within the data science team.
- **Causal Analysis:** Performed deep causal inference studies to isolate specific sales behaviors that drive outcomes, influencing the product roadmap to focus on 'high-leverage' user actions.
- **Technical Consulting:** Acted as a technical consultant for enterprise customers, diagnosing complex data discrepancies and proposing architectural solutions for data integration.
- **Cross-Functional Leadership:** Collaborated seamlessly with Engineering, Product, and Support teams to spec out large-scale infrastructure restructuring.

Data Science Research Team Lead

Sep 2020 — May 2021

UC Berkeley School of Public Health

- **Leadership:** Led data science components for mixed-methods studies on equity and public health (specifically violence against homeless youth). Managed a team of undergraduates.
- **Unstructured Data:** Analyzed diverse unstructured and non-traditional datasets (qualitative interviews, geospatial data, text corpora, hand-drawn maps) requiring the development of novel data processing approaches.
- **Geospatial Analysis:** Led geospatial analysis of violence against homeless youth in San Francisco, combining location data with Census geography (ArcGIS, GeoPandas, GeoJSON) to identify and visualize spatial patterns for non-technical stakeholders.
- **Visualization:** Created interactive dashboards (Tableau, Plotly) to communicate findings to stakeholders.
- **Interdisciplinary Collaboration:** Collaborated across disciplines (public health, psychology, sociology) ensuring ethical, robust research.

Full Stack Engineer

May 2019 — Aug 2019

Los Medanos College

- **Full Stack Development:** Independently designed and developed a web application (Python, JavaScript, PHP, PostgreSQL) to guide student program selection.
- **Data Acquisition:** Built a database of 500+ university programs via web scraping (Beautiful Soup) and rigorous data cleaning.
- **Stakeholder Consulting:** Consulted with college stakeholders (district, counselors) to define user needs.
- **UX/UI:** Created an intuitive management dashboard for non-technical staff.

EDUCATION

University of California, Berkeley

Aug 2019 — May 2021

Bachelor of Arts in Data Science (Domain Emphasis: Quantitative Social Science)

GPA: 4.00/4.00

Highest Distinction (Summa cum laude). Outstanding Data Science Undergraduate Award (Top of Class).
