Jack Stehn

Software Engineer

San Francisco, California • jack.stehn@protonmail.com • www.linkedin.com/in/jack-stehn • github.com/jstehn • greenwolf.me

PROFESSIONAL SUMMARY

Software Engineer who builds production systems at the intersection of data and software. I bring strong engineering practices (testing, modular design, clean code) to APIs, integrations, and cloud infrastructure, and have led cross-functional technical initiatives.

EXPERIENCE

Data & Customer Delivery Engineer (Contract)

Mar 2026 — Sep 2026

Innovare

- **System Reliability:** Owned the stability and scalability of production data systems serving enterprise customers, treating analytics infrastructure as a software product with uptime, correctness, and performance requirements.
- **Architecture Consulting:** Helped design a Medallion architecture on BigQuery with clear layer contracts from ingestion to serving.
- **Modern Toolchain Advocacy:** Proposed replacing ad-hoc scripts with a tested, version-controlled stack: Terraform, dlt, dbt, Dagster, Cube.js.
- **Workflow Automation:** Designed and built automated workflows that replaced manual, error-prone delivery processes — reducing turnaround time and eliminating recurring operational toil.

Data Scientist (Lead: Data Systems, Platform Engineering) - Ed Pioneers Fellow

Sep 2024 — Oct 2025

Caliber Public Schools

- **Platform Architecture:** Architected and built a scalable data platform on GCP, orchestrating automated pipelines using Dagster, dbt, and dlt with comprehensive test coverage.
- **API Integration & Interoperability:** Solved complex system interoperability challenges by designing integrations between Schoolmint and PowerSchool. Reverse-engineered undocumented APIs to create a unified data model.
- **Engineering Maturity (ROI):** Automated data quality checks, cutting manual consistency work from months a year to seconds.
- **Data Democratization:** Updated the data security policy and built trainings so non-technical staff could access real-time metrics.

Data Scientist (Infrastructure, ML Systems)

Aug 2021 — Feb 2023

SetSail

- **Pipeline Architecture (AWS):** Led an AWS data infrastructure overhaul (S3, Athena, EMR), cutting processing latency 75% at multi-TB scale.
- **Engineering Best Practices:** Championed CI/CD (GitHub Actions), unit testing (pytest), and Agile within the data science team.
- **Scalable Data Modeling:** Architected scalable Star Schema data models and optimized ETL/ELT processes, ensuring data readiness for LLM integration.
- **Business Impact:** Contributed to product enhancements that achieved 33% faster ramp times, 16% higher revenue, and 15x customer ROI.
- **Cross-Functional Leadership:** Worked with Engineering, Product, and Support to spec a large-scale infrastructure restructuring.
- **Technical Consulting:** Diagnosed data discrepancies for enterprise customers and proposed architectural fixes.

Full Stack Engineer

May 2019 — Aug 2019

Los Medanos College

- **Full Stack Development:** Built a web app (Python, JavaScript, PHP, PostgreSQL) to guide students' program selection.
- **Data Acquisition:** Built a database of 500+ university programs via web scraping (Beautiful Soup) and rigorous data cleaning.
- **UX/UI:** Created an intuitive management dashboard for non-technical staff.
- **Stakeholder Consulting:** Consulted with college stakeholders (district, counselors) to define user needs.

EDUCATION

University of California, Berkeley

Aug 2019 — May 2021

Bachelor of Arts in Data Science (Domain Emphasis: Quantitative Social Science)

GPA: 4.00/4.00

Highest Distinction (Summa cum laude). Outstanding Data Science Undergraduate Award (Top of Class).
